

# PREMIUM IV MENU

At Hansen Health Solutions we offer the highest quality physician designed IV and injection therapies in a medical setting

Our premium IV's use the latest research to deliver the most potent recipes available

Oxygenator.....\$149

IV Ozone

A small amount of blood is drawn, mixed with saline and ozone, then the oxygenated blood is returned via IV. Ozone oxygenates the blood, regulates the immune system, & corrects oxidative stress

Use for pain, inflammation, arthritis, immune disorders, fibromyalgia, chronic fatigue, allergies

\*Requires one-time blood test

Cell Cleanser.....\$249

Oxygenator + UV Light Therapy

This adds a step to Oxygenator where your blood passes through a full spectrum of ultraviolet light. UV light therapy deactivates the DNA of viruses, bacteria, fungus, yeast/candida, parasites and other pathogens

Use for infections, immune disorders, cancer support, depression

\*Requires one-time blood test

MEGA Dose Liquid Gold IV Vitamin C

25g.....\$225

50g.....\$275

75g.....\$345

100g.....\$395

Boost the immune system, speed healing, anti-aging, antioxidant, antiviral

Use for increased immunity, cancer support, healing, collagen production

\*Requires lab draws every 3 months

Restore.....\$475

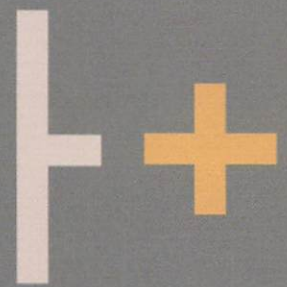

Combo Cell Cleanser & 25g MEGA Dose Liquid Gold IV Vitamin C

All IV therapy is done under the direction of medical supervision and may require additional clearance to maintain the highest standards of quality and safety.

IV intake form must be completed prior to appointment

\*All prices are subject to change without prior notification due to material costs and availability. All recipes are subject to change due to ongoing research.

# FUNCTIONAL TESTING

## GI Map.....\$850

The gut is home to beneficial bacteria, fungi, parasites - and this microbiome plays a critical role in mediating the effects of diet and other factors of health. This test maps the microbes present in your gut to help our providers get to the root cause of chronic illness.

Weight · Digestive · Mood disorders · Skin problems  
Autoimmune diseases · Brain fog

## Adrenal Stress Profile.....\$450

This test measures cortisol and five other hormones in your saliva to help you discover possible causes of fatigue, stress, anxiety, and weight issues. This test provides more complete measurements and deeper context for your hormone levels than standard serum and urine testing. This test also outlines your unique stress patterns and adrenal fatigue.

Chronic stress · Fatigue · Anxiety · Depression · Insomnia · Weight loss resistance  
Muscle/joint pain · Memory issues

## Heavy Metal Toxicity .....\$450

Evaluate your body's exposure to and retention of toxic elements. This test can also monitor the efficacy of metal detoxification therapy. Some metals it detects are lead, aluminum, mercury, etc.

Toxic element exposure · Depression · Low bone density · Cardiovascular disease · Alopecia  
Neuro inflammation · Chronic fatigue · Metabolic dysfunction · Joint/Muscle pain · Brain fog

## Mold Toxicity.....\$650

This test detects 100's of species of molds. Molds are some of the most prevalent toxins in the environment. A majority of mycotoxin exposures are through food ingestion or airborne exposure.

Heart disease · Asthma · Sinusitis · Cancer · Memory loss · Vision loss · ADHD · Anxiety · Fatigue  
Brain Fog · Weight gain · Weight loss resistance · Joint/Muscle pain

## Comprehensive Nutritional & Metabolic Profile.....\$960

The most complete nutritional assessment that evaluates over 125 biomarkers to assess deficiencies of more than 40 antioxidants, vitamins, minerals, essential fatty acids, amino acids, digestive support, metabolism, & detox pathways

Fatigue · Toxicity · Gut health · Autoimmune conditions

**Metabolic Profile.....\$550**

Used to discover your unique metabolic signature, this test provides an in-depth view of the function and efficiency of multiple aspects of your unique biochemistry and metabolism. This analysis will assist us in unraveling your metabolic pathways and revealing your metabolic status.

Inflammation · Stress · Mood Swings · Overall well-being · Fatigue · Weight loss resistance

**Genomic Profile (DNA).....\$600**

This ONE-TIME DNA test uses a simple cheek swab, to evaluate eight key areas of health, including methylation, structural (i.e., bone health), aging, cognitive health, detoxification, endocrine health, inflammatory status, and gastrointestinal health. One test will run multiple results with continued updates.

Anti aging · Energy/metabolism · Gastrointestinal · Detoxification · Inflammation

**Lyme.....\*\$1000**

Tick-born illness testing that is nearly twice as accurate as CDC recommended tests. This tests for all major tick-borne illnesses, including Lyme disease, TBRF, Babesiosis, Bartonellosis, Anaplasmosis, Ehrlichiosis, and Rickettsiosis.

\*Pricing starts at \$1000. Pricing varies depending on the scope of testing.

Pain · Fatigue · Brain fog

**Cardiovascular Profile.....\$325**

Are you taking statins and are they really helping? The leading cause of death in the US is cardio vascular disease. This blood test provides a real, in-depth and accurate assessment of cardiovascular risks so that we may provide an idealized treatment option.

Cardiovascular disease · Heart health · Inflammation

\*Pricing includes Consult and Nutritional Protocol.

\*Each functional wellness test kit contains detailed instructions on how to non-invasively collect samples and send in for analysis. A report with the results contains a unique, in-depth assessment of many key areas of biochemistry and metabolism essential for human health.

\*All prices are subject to change without prior notification due to material costs and availability.
